

Turn Your Old Toothbrush Into A Fun Recycled Bracelet

What you'll need:

Toothbrush

Tweezers or
Pliers

Cooking Pot

Tongs

Large Mug

Oven gloves

DONE!

Now show your new bracelet off to your friends.

4

Place bent toothbrush in bottom of mug to hold its shape while it cools.

Pour ice water in mug to set and then remove your new bracelet.

1

Remove all bristles from the toothbrush with pliers or tweezers.

2

Bring pot of water to boil. Submerge toothbrush and boil for 5 minutes.

3

Remove toothbrush with tongs, carefully bend to desired shape and size.

If toothbrush doesn't bend easily, submerge in hot water again for an additional 2 minutes.

Bend as needed.

TIP

This craft requires fishing the hot toothbrush out of boiling water and bending it while it's still hot. Be sure to use a simple toothbrush. The fancier and more high tech the toothbrush the stronger and more difficult it is to bend.
